

360° Hack Prevention:

Managed ATTACK Path Management Services – by Traxion.

Our Managed Attack Path Management service suite (referred to as ‘Managed APM’) is the essential security upgrade for your business and a true time saver for your admins: Change the way you evaluate cyber risk, from initial setup to ongoing 24/7 maintenance and instant remediation. See which of the four protection levels fits your business.

Ransomware, cyber-attacks, and malware – the culprit for IT security incidents is often one singular, small entry point: All it takes is for the weakest chain in your system to be breached and the attacker is inside the perimeter, gaining elevated privileges along the way. According to XM Cyber’s internal research, it often takes intruders just four steps to get access to 94% of critical company resources.

The Threat Unknown

One of the greatest threats in any IT environment is the **unknown**: Every infrastructure has inherent weaknesses that won’t be revealed until it’s too late – such flaws are hard to spot with feasible efforts. In some scenarios it’s a true cat-and-mouse game as admins might be fully aware of such flaws but lack the resources to fix them all. Your staff cannot (and should not) focus their attention on identifying every possible vulnerability or staying up to date on emerging threats on an hourly basis. Enter XM Cyber.

The Solution – A Hackers Vantage Point

XM Cyber’s approach to “Attack Path Management” unveils the weakest links in your company’s IT chain. The all-in-one dashboard evaluates data provided by XM Cyber’s sensors, which are installed across your infrastructure, and shows vulnerabilities from an intruder’s perspective. It helps protect critical resources while freeing up your internal resources. This product data sheet dives into XM Cyber and how it safeguards your IT with 15 patents under its belt.

Below we’ll explore how our Managed APM service suite supports your daily operations and how you can choose between various tiers, tailored to your needs.

Swiss IT Security Group + XM Cyber = 360° Security à la carte

Setting up XM Cyber is the first step towards attack prevention: Our service suite **Managed APM** is available in four tiers, covering basic setup, configuration, and training whilst our top tier offers 24/7 monitoring and remediation.

To start things off, our **Onboarding** tier ensures a tailor-made installation of XM Cyber to offer round-the-clock protection for your business.

Bronze gives you attack simulations, staff trainings so your IT can manage and react to threats, as well as our helpdesk for support and key concerns.

Our **Silver** tier takes things further by offering remediation management on top: Our experts help you monitor critical processes and apps to fix vulnerabilities before they become actual threats.

Gold offers 24/7 monitoring from our team: Our Attack Path Taskforce keeps optimizing your IT and implements solutions on the fly.

Managed APM services suite

Onboarding

Plan, Design & Build

360°-Protection of your critical IT assets with XM Cyber, from your on-prem desktop to cloud apps spread across the cloud.

Our service suite includes

- ▶ Review of your entire IT infrastructure followed by a ready-to-go scope.
- ▶ Tailor-made configuration and live testing of XM Cyber.
- ▶ Configuration of XM Cyber sensors to leverage machine learning for monitoring and exposure of vulnerabilities.

Evaluation, Design & Setup

Test

Initial evaluation of XM Cyber in your live environment to validate and enhance your existing setup.

Our service suite includes

- ▶ Review of user groups and privileges.
- ▶ Set up communication interface(s) between XM Cyber and all your critical systems.
- ▶ Attack simulation and output evaluation.

Test & Attack Simulation Setup

Tenant Management

Initial evaluation of XM Cyber in your live environment to validate and enhance your existing setup.

Our service suite includes

- ▶ Sensor monitoring.
- ▶ Analysis of performance, capacity and availability data.
- ▶ Fine-tuning based on output and implement upgrades as needed.

Health- & Performance Reporting

Bronze

Applications Management & Training & Helpdesk

Enhanced attack simulation to continuously strengthen your IT's defense.

Our service suite includes

- ▶ Development of attack pattern simulations.
- ▶ Ongoing attack and evaluation sprints for security optimization.
- ▶ Action plan setup for swift implementation based on attack results.
- ▶ Employee trainings conducted by our experts and included helpdesk support.

Simulation Plan, Simulation Outcome & Analysis

Silver

Remediation Management & Integration

Development of our remediation playbook and swift implementation of key learnings.

Our service suite includes

Bronze +

- ▶ Define and implement all required measures.
- ▶ Develop remediation playbook.
- ▶ Define security processes and integrate into ISMS.

Remediation Playbook

Gold

24/7 High Risk Incident Readiness

Ongoing 24/7 support for detection and remediation of high risk vulnerabilities.

Our service suite includes

Silver +

- ▶ Ongoing monitoring of all your systems for new vulnerabilities.
- ▶ Instant support upon detection of a vulnerability.
- ▶ 24/7 monitoring.

Documentation

The Result: Tailor-made protection for your IT

Our packages fully integrate Attack Path Management and continuous monitoring into your environment, ready-to-use and monitored by Traxion. We'll support you from implementation to threat mitigation:

- ▶ **A strong security strategy setup** using Managed APM to see how attackers could penetrate your systems and build effective shields.
- ▶ **Clear savings on internal resource, mistakes, and pitfalls.** Let our experts take care of your IT security.
- ▶ **Maximum security** – Our Managed APM services suite boosts IT defenses measurably.

About XM Cyber

XM Cyber brings the expertise of the world's leading IT security specialists to your door. XM Cyber has developed more than 15 patented technologies based on a proprietary set of algorithms that enable the continuous and automatic simulation of a hacker's techniques and methods.

Traxion offers tailored Managed APM services for XM Cyber. Our experts will not only help you find the perfect solution. We will also implement the system for you and make sure you get the best value out of it.

About Traxion

Traxion is an information security company, operating in the Benelux and DACH region, specialized in Identity & Access Management. Thanks to our team of over 150 specialists, our independence and the many successful projects, Traxion has built up more than 20 years of experience and knowledge in the field of Identity and Access Management.
